

PROFESSIONAL SUMMARY

- Dynamic and creative iOS Developer with expertise in SwiftUI, Swift, and Objective-C.
- Skilled in database management using SQLite and CoreData.
- Proficient with tools such as Xcode, Git, GitLab, Figma, and Adobe XD.
- Successfully developed and delivered innovative apps like The Oforis Radio Station, e-menubox, and Bonton Holidays.
- Experienced in building features like live streaming, real-time menu management, and B2B booking systems.
- Strong focus on user-centric design, technical precision, and creativity.
- Passionate about continuous learning and leveraging technology to create impactful solutions.

CAREER CONTOUR

- **WeTheDevelopers** – April 2018 – February 2021
- **Anzo Technology** – February 2021– July 2022
- **Nota Bene Global Services** – July 2022– Present

IT SKILLS

SWIFTUI	SWIFT	OBJECTIVE C
SQLITE	COREDATA	XCODE
VSCODE	GITHUB	GITLAB
SOURCE TREE	FIGMA	ADOBE XD

PROJECTS

The details of the various assignments that I have handled are listed here, in chronological order.

Project: #1

Project	The Oforis Radio Station & Tune In App
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, REST API, Agora SDK, Alamofire SDK, Firebase SDK, Live Streaming.
Details	○ Radio Station app is for Radio Jockey, it includes features like creating own radio channel and Go LIVE to perform radio show. ○ Tune In app is for end users to listen to any LIVE streaming radio. It includes features like to request a LIVE call on radio with Radio Jockey and ask to play song you like.

---------------------	--

Project: #2

Project	e-menubox
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, REST API, Firebase SDK, QR Scanner
Details	- e-menubox is a digital revolution for hotel/restaurant menu system. - It converts physical menu to the digital in seconds and allows user to scan and see the menu with and without application. It also allow hotel/restaurant owners to manage menu from Partner Application.

Project: #3

Project	Bonton Holidays
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, REST API, Payment Gateway, Firebase SDK, Alamofire SDK
Details	Bonton holidays is a B2B flight, hotel, holiday, etc booking system.
Project Link	→ App: https://apps.apple.com/in/app/bonton-holidays/id1447607716

Project: #4

Project	Vibranium
Roles and Responsibilities	iOS Developer
Technology	SwiftUI, REST API, Firebase SDK, GST Registration Details API
Details	Vibranium is an antivirus software provider company, User can access their activations, devices and many more from application.
Project Link	→ App: https://apps.apple.com/in/app/vibranium/id1599033548

Project: #5

Project	Schonell Access
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, REST API, Bluetooth Connection, Socket Programming
Details	○ With this app, you can connect to your building's entrance and grant access at any time on your smartphone. ○ The Schonell Access App allows users to grant wireless access from our smart interphone entry station to devices connected to Wifi or 4G cellular networks.
Project Link	○ → App: https://apps.apple.com/sg/app/schonell-smart-video-intercom/id1171733979

Project: #6

Project	CandleStick Scanner
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, In-app purchase, Localization, REST API
Details	○ This application scans, identifies & alerts the user for all the major candle sticks pattern viz. Gravestone doji; Hanging Man, Shooting Star, Shaven head, Shaven bottom, Bearish harami, Bearish harami cross, Bullish 3-method formation, ○ Bullish harami cross, Morubozu, MCX Market, Hammer CandleStick, Engulfing bearish line, Engulfing bullish; Falling window, Morning Doji Star, Bullish Harami, On Neckline; Three Black Crows, Three White Soldiers, Tweezer Bottoms, Tweezer Tops, Doji Star, Piercing Line, Rising Window, Dark Cloud Cover, GragonFly Doji.
Project Link	○ → App: https://apps.apple.com/in/app/candlestick-scanner/id1551916401

Project: #7

Project	A Fire Safety Door
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, iPhone / iPad support, Wifi TCP Connection, Bluetooth Connection, Socket Programming
Details	○ It is working with Wi-Fi & BLE to setup, store / restore backups, configure custom settings, different user roles and core part is communication from iOS app to hardware.

Project: #8

Project	A Smart Pain Blocking Technology
Roles and Responsibilities	iOS Developer
Technology	SwiftUI, Bluetooth Connection, OTA firmware update, Firebase SDK
Details	○ An BLE device can be connect with iOS and attach with human skin, user can adjust pain level from application and get pain relief by performing some sessions

Project: #9

Project	Location Based Restaurant Offer
Roles and Responsibilities	iOS Developer
Technology	Objective C with storyboard, REST API, Significant location service, Firebase SDK, Alamofire SDK
Details	○ An application which is acquiring user's significant location and send notification when user cross any interested restaurant.

Project: #10

Project	Racing App
Roles and Responsibilities	iOS Developer
Technology	Swift with storyboard, REST API, XPRO GPS Navigation SDK, Firebase SDK, Alamofire SDK
Details	○ An application where racer register them self, add their vehicles, perform single player / multi player race on road while application is capturing data, announce winner / loser and give rewards based on performance. ○ User can use reward for their car upgradation.

Project: #11

Project	Shooting Game
Roles and Responsibilities	iOS Developer
Technology	SwiftUI, REST API, UDP & TCP Communication, Socket Programming, Firebase SDK
Details	○ A cowboy shooting game app to show game data and manage players and their bookings.

EDUCATION

DEGREE AND YEAR	INSTITUTE
Bachelor of Engineering	2014-2017 University: Gujarat Technological University CGPA: 9.25 / 10.0
